

## ARSSPLASH WATER PLAY SURFACE

ARS Landscaping Water Play surface is composed of high quality UV Resistant TPV or EPDM rubber granules with an aliphatic polyurethane binder. This mixture provides a long lasting, durable water play surface that is ADA compliant and requires minimum maintenance. Our surface is professionally installed throughout leaving us with a porous, non-slip, seamless finish. We offer a wide range of colors allowing for infinite design possibilities, making it the perfect play surface. Being used on Pool Decks, Splash Pads and Water parks, our water play rubber surface is always a great choice!
