

ARSACTIVE TRACK SURFACING

ARS Landscaping installs indoor and outdoor tracks for all athletic areas. Our ARSActive Running track surface uses an EPDM rubber granule matrix combined with polyurethane binders make our track an exceptional running surface. It is well known for its proven durability, resiliency, low maintenance and long-lasting features, making it the ideal athletic surface for all. Our surface is water permeable and consistently performs through a wide range of temperatures and weather conditions. ARSActive is always carefully installed leaving a quality finish! Ask about the different track surface systems we can provide!

System Features

- Seamless
- Shock Absorbing
- Permeable
